

# Internship Data Analytics

<b>Location</b>	Berlin (Germany) and/or Amersfoort (the Netherlands)
<b>Context</b>	<p>Arcadis is the leading global Design &amp; Consultancy firm for natural and built assets. Applying our deep market sector insights and collective design, consultancy, engineering, project and management services we work in partnership with our clients to deliver exceptional and sustainable outcomes throughout the lifecycle of their natural and built assets. We are 27,000 people active in over 70 countries that generate more than €3.3 billion in revenues. We support UN-Habitat with knowledge and expertise to improve the quality of life in rapidly growing cities around the world. <a href="http://www.arcadis.com">www.arcadis.com</a>.</p> <p>Digital and (other) exponential technologies have already impacted many types of industries and organizations across the globe with their ability to provide a more human-centred experience. Starting with the tech industry (when it still was considered a separate sector), and quickly followed by media, entertainment, retail, banking, etc. Today, there are only a handful of areas that are yet to be disrupted. This includes the construction and engineering industry, in which Arcadis operates. Unlike most big corporations involved in natural and built (physical) assets, our board is aware of the opportunities (and risks) these new digital technologies offer (and pose) and has therefore taken extraordinary measures to proactively reinvent our business in the coming years.</p>
<b>Reporting lines</b>	Global Director Data, Analytics & Insights
<b>Job description</b>	<p>Arcadis's Data Analytics &amp; Insights team, is looking for 4 interns (for a period of 3-6 months), located in Berlin (Germany) and/or Amersfoort (Netherlands).</p> <p>Key activities include:</p> <ul style="list-style-type: none"> <li>• Helping with the development of a Knowledge Sharing platform around Analytics use cases, code and capabilities;</li> <li>• Developing an overview of existing internal and external data sets to include in a data lake;</li> <li>• Organizing key community-building events, such as an Analytics conference or internal Community of Practice Events;</li> <li>• Helping with the design and implementation of global training programs for Analytics Translators, Data Scientists and Data Engineers.</li> </ul>
<b>Requirements</b>	<p>Nobody is perfect, and that is fantastic. We expect you to fail, learn and succeed several times in this role. That said, it would be great if you:</p> <ul style="list-style-type: none"> <li>• Have experience as Project or Event Manager;</li> <li>• Are interested in Analytics and Digital in the Design, Construction and Engineering industry;</li> <li>• Possess strong MS Office (in particular PowerPoint) skills;</li> <li>• Are on-track finishing your Bachelor or Master degree at a top university.</li> </ul>
<b>What do we offer?</b>	We offer a dynamic challenging internship with international focus in a pleasant working climate. You will have a great deal of responsibility with opportunity for impact and freedom for initiatives.
